NordLocker Free Download [Win/Mac]

[Download]

NordLocker Crack+ With Product Key Free Download (April-2022)

NordLocker is a free, privacy-oriented and secure cloud storage service that allows you to share your photos, videos, audios and other files with your friends, family and colleagues. Encryption helps you to keep your files safe from intruders. NordLocker can be easily used on any device like Android or Windows and doesn't require any additional plugins. It is also an excellent backup solution, providing you with automatic photo and video backup options. You can access your private files by means of your own custom URL or by using the web application. NordLocker stores your files in their own cloud storage network which makes it impossible for third parties to see what is being stored there. You can also access your files by means of the built-in FTP, WebDav, S3 and Google Drive options. You can share your files to Facebook, Twitter, Skype and Gmail as well. Your data is always backed up and you can download them to your hard drive. What's more, you can use any of the above-mentioned services, as well as other available cloud storage solutions, to send and receive files over the internet. 1. Create your account - Select which files to share with others and make them accessible with a URL. 2. Link it with your social network - You can share your files with your friends and family by using their account credentials. 3. Download the free app - With the NordLocker web application, you can manage your accounts and view your files anywhere. NordLocker Free [Win/Mac]

Whether you are at home, at work or using your laptop, you can trust NordLocker Product Key to protect your sensitive data and improve the security of your life, with this 2D-engine security program. We are committed to protecting the privacy of all our customers and their data. If you want to view the NordLocker Torrent Download privacy policy, then you can click here. NordLocker is also a registered trademark of Intel Corp. All trademarks are property of their respective owners. NordLocker is a secure file sharing and collaboration service, which allows users to share files of any kind on all available devices. The main application of the program is the creation of public and private spaces for people, who can now share their files privately or publicly with family, friends and even people outside your circle. With NordLocker, you can now create secure and private spaces that nobody but you can access, keeping your secrets safe. With the help of the drag and drop function, you can easily send any file to a user and only that user will be able to access it. This feature is essential for many people who want to ensure that their work is not stolen or seen by someone else, but only by them. The private spaces in the system are available in your local network only. You do not need to worry about the device you are using, since your files will appear on all available devices. NordLocker can be set up easily, using the step-by-step instructions. Once it is set up, you will not even need to do anything else; your work will be safe and secured from other people. We are very sorry to announce that the NordLocker service is closing down. All users of the NordLocker service will be able to use their files until January 31, 2018. Features: Private and secure space for sharing files Drag and drop files to other users Secure file sharing between people Drag and drop files to an other device Easy to use Receive notifications Create and view the private spaces View the private spaces of other users Encrypt files Decrypt files Access the list of the users in your network Manage your personal information The list of other users in your network About us: NordLocker is a secure file sharing and collaboration service, which allows users to share files of any kind on all available devices. The main application of the program is the creation of public and private spaces for people, who can now share their files 1d6a3396d6

NordLocker Crack

NordLocker is an easy-to-use cloud-based data protection software that guarantees you the most secure way to share your files. NordLocker can be used for sharing any type of files you want and at the same time helps you keep your privacy. Your data is encrypted end-to-end and only the person you are sharing your files with will have access to it. Since the company can't see your files, you will not be sharing your data with an organisation that you do not trust. NordLocker is completely free to use, safe and easy to use. We guarantee the safety of your data. You can add as many files as you want and share them with your friends. You can easily access your files by drag and drop and share them with people. NordLocker comes with many useful tools and you can make your files private by setting a password. With password protected files, only people you trust will have access to them and they will be able to use your files safely and securely. There are no data limitations on NordLocker, therefore you can share files up to 50 GB. Data is protected using the latest technologies and in accordance with the highest standards in the world. We use the latest ciphers to make sure that your files remain completely safe. Once you log in you will have access to all your files. You can share as many files as you want and you can safely send them to your friends without any risk. This tool does not require configuration and has a nice user interface with a simple and intuitive drag and drop feature. You can share your files with people you trust and you don't need to worry about their safety or your privacy being compromised. NordLocker helps you share your files with people you trust and keeps you safe at the same time. NordLocker ensures that your files are only available to the people you want them to be. With its feature of password protection you can make sure that only people you trust can use your files safely. It can come in handy for almost anyone who needs to share files with their friends and family. You can share files of any kind: documents, images, music or videos. You can share personal information and images of yourself and people you trust will not have access to your private data. Upload files of any type There are no limitations on the type of files that can be shared with NordLocker. You can upload files that are encrypted, password protected and personal. For example

What's New In?
